

## GULF MARITIME 2009

### THE RIGHT OPPORTUNITY TO EXPLORE MARKET OPENINGS

Unprecedented developments in the maritime sector have stressed the need for a one-stop sourcing platform and the Gulf Maritime exhibition is undoubtedly the leading event that the regional maritime industry has come to rely on to keep pace with demands of a rapidly growing sector.

It now serves as the ideal gateway for maritime companies to the entire Middle East and North Africa region, CIS countries and the Subcontinent. Apart from sourcing products and services, it will be a key venue to interact with industry leaders and gauge market needs.

The exhibition will showcase deck machinery and other vessel equipment, docking equipment, electronics, communication and navigation systems, engine and propulsion systems, fuel and lubricants, ride control systems, sound and vibration control systems and marine interiors.

Other major exhibits will include paints and coatings, latest vessel building designs and technology, equipment for fishing, offshore support vessels, cargo ships, tankers, tugs, ferries and patrol boats, ship repair and port operations products and cargo handling services, among others.

With leading names from the sector converging on Sharjah for the event, Gulf Maritime will hog international limelight and pull in trade visitors and industry representatives in large numbers.

## GULF MARITIME 2008

### THE PREVIOUS EDITION

The sixth edition of the Gulf Maritime exhibition held from April 21 to 23 featured more than 100 exhibitors, who displayed their products and equipment across 4,000 sq m of space.

The exhibition will have a dedicated display area for workboats and commercial craft.

## Gulf Maritime Conference

A high quality conference addressing the regional maritime challenges will be held alongside the exhibition.

Covering different aspects of the maritime industry, the conference will gather the decision makers and key players in the region, and provide an effective networking opportunity among the attendees.
